Paper 2
9/8/2011

Write Thesis & Outline

Paulo Freire claims that the student teacher relationship, where the student is a 'container' to be 'filled' by the teacher, makes the student the object of an education that is 'owned' by the teacher. Argue whether the 'The Banking Concept of Education' is an appropriate mode of conducting a college classroom.

In your 2-3 page paper:

Make sure you argue why or why not 'The Banking Concept of Education' is a reasonable college level model.

Consider how Freire's criticism of the education system correlates to Morrison's ideas of a dead, oppressive language, and how the 'Banking Concept' may also be a mode of oppression.

Support your position with quotes from Freire and, when applicable, Morrison or any other related texts from the unit.

You may also quote from Feynman's essay "O Americano Outra Vez," relating his ideas about the difference between **learning** and **knowing** to The Banking Concept of Education.

Make sure you use double space, use size 12 font, 1 inch margins, and attach a Work Cited page.

If your paper is not at least 2 pages, you will receive an F and be asked to rewrite the assignment.
